

WIFE TOO ILL TO WORK IN BED MOST OF TIME

Her Health Restored by Lydia E. Pinkham's Vegetable Compound.

Indianapolis, Indiana. — "My health was so poor and my constitution so run down that I could not work. I was thin, pale and weak, weighed but 109 pounds and was in bed most of the time. I began taking Lydia E. Pinkham's Vegetable Compound and five months later I weighed 133 pounds. I do all the housework and washing for eleven and I can truthfully say Lydia E. Pinkham's Vegetable Compound has been a godsend to me for I would have been in my grave today but for it. I would tell all women suffering as I was to try your valuable remedy." — Mrs. Wm. Green, 332 S. Addison Street, Indianapolis, Indiana.

There is hardly a neighborhood in this country, wherein some woman has not found health by using this good old-fashioned root and herb remedy. If there is anything about which you would like special advice, write to the Lydia E. Pinkham Medicine Co., Lynn, Mass.

American sporting goods, including tennis rackets and balls, are in demand in Spain.

GOOD FOR HUNGRY CHILDREN

Children love Skinner's Macaroni and Spaghetti because of its delicious taste. It is good for them and you can give them all they want. It is a great builder of bone and muscle, and does not make them nervous and irritable like meat. The most economical and nutritious food known. Made from the finest Durum wheat. Write Skinner Mfg. Co., Omaha, Neb., for beautiful cook book. It is sent free to mothers.—Adv.

The average inhabitant of this earth probably uses more than two pounds of provisions a day.

If you have been threatened or have GALLSTONES, INDIGESTION, GAS or pains in the right side write for valuable Book of Information FREE. L. E. BOWEN, DEPT. W-4, 119 S. WABASH ST., CHICAGO

CAULIFLOWER IN FAVOR

Vegetable Is Closely Related to the Cabbage Tribe.

Very Rich Soil Required, and It Must Be Given Most Particular Treatment—Market Demands Snowy White Heads.

Cauliflower is closely related to the cabbage tribe, but much more refined in its habits and more difficult to cultivate. It requires a very rich soil and the most particular treatment, and no farmer or gardener would be justified in attempting its cultivation on a large scale, or to depend upon it as a market crop without first having thoroughly studied its peculiarities and requirements.

The market desires snowy white heads, so that protection is universally practiced to accomplish this purpose. Three methods are used: (1) The breaking of half a dozen or more leaves over the top of the cauliflower head. The stems of the leaves are not severed entirely, so that the leaves remain green. (2) Breaking or bending over the leaves as just explained, and pinning with toothpicks or small pins. This is a very satisfactory method for all sections. (3) Bringing the leaves together over the head and tying. This is an excellent plan, but requires more time than securing with the toothpicks. The protection should begin when the heads are about an inch and a half in diameter.

Cauliflower is considered a delicacy on most tables, and it pays to exercise special care in the marketing. Although barrels are often used, crates or baskets are better. A package which will not hold more than a dozen or at most two dozen heads certainly has an advantage over the barrels.

If the heads are of good size, snowy white, wrapped in fancy paper, and marketed in new, clean packages they cannot fail to attract attention, and command good prices.

POTATO GATHERER IS HANDY

Mechanism Is Placed on Forward End of Frame of Device—Conveyor Carries Potatoes.

Wisconsin is coming to the front as a potato state, and as a standardized variety potato state that uses pedigree seed it leads them all. Naturally, potato interests are receiving the attention of inventors more or less in that state. Here we are showing a drawing of a recent patent of a potato gatherer by a Louisburg (Wis.) man. The gathering mechanism is placed in the forward end of the frame that is pivoted on a wheeled axle, a conveyor for carrying the potatoes back to the rear from the gathering mechanism being also carried. The frame carries fingers of unequal length, placed successively long and short, and directed forward over the conveyor. A second conveyor is mounted on the frame above the first one, the upper one carrying transverse rake bars.—Farming Business.

Fix Up Cow Lot.

Nobody likes to walk about in mud and filth while caring for cattle. With a little work and small expense the cow lot can be made a better place to go into.

Manure Applied in Garden.

Barnyard manure is good for the garden if applied at the right time, but there are times when its application is harmful. Fresh manure, when applied immediately before planting, cannot be thoroughly incorporated with the soil. As a result the land is hard to work and the ground is loose instead of compact. Fresh manure also induces a rank growth of stem and leaf, and, as a result of these factors, the yield of most vegetables is greatly reduced.

Feeding Hogs in the Field.

A cornfield with rape either in the field or along one side and alfalfa or clover patch on the other side is the most ideal combination imaginable for feeding hogs in the field. In the absence of complete supplement of this kind put in a self-feeder and keep tankage or meat meal in it. The pigs will eat what they need and can use to advantage, and no more.

The Duck Quarters.

About eight square feet of housing should be allowed each duck, or 40 ducks to a pen 24 by 15 feet.

VALUABLE AS GREEN FODDER

Opinion of Growers of Sudan Grass Is That It Will Largely Take Place of Millet and Sorghum.

Most of the earlier accounts of Sudan grass failed to make clear that this new crop is nothing more or less than a fine-stemmed, nonsaccharine sorghum. It has most of the characteristics of the ordinary sorghum, and its requirements as regards soil and climate are similar except that the Sudan grass differs from sorghums by maturing earlier and having such fine stems that it is readily cured into hay.

Experiments made at the Kentucky state station in 1915 produced a crop of eight tons per acre of dry hay in

Sudan Grass in Texas.

two cuttings. This exceptionally high yield was made possible by unusually fertile soil and good culture. The plots were drilled about the middle of May, using 20 to 25 pounds of seed to the acre, seeded with an ordinary grain drill.

The first crop was cut when the Sudan grass was fully headed, and the second crop in time to avoid the first frost.

Where Sudan grass has been grown for two or three years it is the opinion of the growers that it will largely take the place of millet and sorghum for fodder purposes, and also be valuable as a green fodder to cut for supplementing pasture.

SELECTION OF CHOICE SEED

Crops Don't "Run Out," Say Experts at Ames—Fanning and Grading Are of Importance.

The old idea that farm crops "run out" may safely be looked upon as a humbug, say the farm crops men at the Iowa experiment station at Ames; that is, if reasonable care is given to the selection of good seed and proper methods of soil culture each year. Under careless management, of course, crops will deteriorate the same as animals or men.

If, due to careless handling, farm crops do run down or "run out," the best thing to do is to run them out. Dispose of the poor stuff and make a fresh start with good seed from the farm of a thrifty neighbor. Then keep the seed good.

With tests of hundreds of varieties of different classes of crops at the experiment station at Ontario, Canada, Ames and other places, where reasonable attention was given to fanning and grading seed each year, cases of "run out" are practically unknown. This has also been the case on all well-managed farms, also.

With proper management and normal conditions the seed grown on the farm should always be the best seed for that farm.

AUTUMN DEMAND FOR CELERY

Tendency to Rush Product to Market Before It Is Well Blanched—Loss in Trimming.

The bracing fall weather will stimulate the demand for celery. At this season when it is selling readily at good prices, there is a tendency to rush celery to market before it is well blanched. This is a mistake, because it necessitates severe trimming at the market end, and the product goes to the cheaper trade. To catch the best grade, celery must be fully blanched, clean and well trimmed.

"Handling" celery should be finished promptly and the rows ridged as fast as possible. If the soil is allowed to get into the hearts of the plants it will cause rot. Celery intended for storage should not be ridged. In some quarters there is a prejudice against blanching celery with boards. It is claimed that blanching with earth makes it crisper and gives it a better flavor. Just the same, much of the product grown in various parts of the country is blanched with boards, and it sells for top prices, too.

W. L. DOUGLAS

"THE SHOE THAT HOLDS ITS SHAPE" FOR MEN AND WOMEN

\$3.00 \$3.50 \$4.00 \$4.50 & \$5.00 Save Money by Wearing W. L. Douglas shoes. For sale by over 9000 shoe dealers. The Best Known Shoes in the World.

W. L. Douglas name and the retail price is stamped on the bottom of all shoes at the factory. The value is guaranteed and the wearer protected against high prices for inferior shoes. The retail prices are the same everywhere. They cost no more in San Francisco than they do in New York. They are always worth the price paid for them.

The quality of W. L. Douglas product is guaranteed by more than 40 years experience in making fine shoes. The smart styles are the leaders in the Fashion Centres of America. They are made in a well-equipped factory at Brockton, Mass., by the highest paid, skilled shoemakers, under the direction and supervision of experienced men, all working with an honest determination to make the best shoes for the price that money can buy.

Ask your shoe dealer for W. L. Douglas shoes. If he cannot supply you with the kind you want, take no other make. Write for interesting booklet explaining how to get shoes of the highest standard of quality for the price, by return mail, postage free.

Fall Run of Distemper

MAY BE WHOLLY AVOIDED BY USING "SPOHN'S" A small outlay of money brings very great results. It is a sure cure and a preventive if you use it as per directions. Simple, safe and sure. The \$1 size is twice the quantity and an ounce more than the 50c. size. Get your horses in best condition for late fall and winter. All druggists, harness dealers or manufacturers. SPOHN MEDICAL CO., DOCTORS OF ANIMALS, GOSHEN, IND.

Cardui Wins Suit.

After a trial in the United States District Court of Chicago, before Judge Carpenter and a federal jury, the jury found the American Medical Association guilty of libeling Cardui, the woman's tonic, which they had denounced as a "nostrum."

This is a vindication of the medicine and a proof that it has merit, which was recognized by a jury after a trial of three months, one of the longest civil cases on record.

Many doctors and chemists testified on both sides and the evidence totaled nearly four million words.

The Way.

Casey—Phwat's a bank? Maloney—It works loike this: For instance, Oi put money in an' ye draw it out.

Casey—But how does the bank make anything?

Maloney—Sure, they either knock down part of phwat Oi put in or short-change ye on phwat ye draw out.

Dr. Peery's "DEAD SHOT" is an effective medicine for Worms or Tapeworm in adults or children. One dose is sufficient and no supplemental purge necessary.—Adv.

Lost Art.

The four-year-old had just been re-proved at the table. He continued to talk cheerfully, though unanswered, to father. After some minutes of soliloquy he turned to mother and remarked:

"Your husband doesn't talk very much this noon, does he, mother?"—Harper's Weekly.

Important to Mothers

Examine carefully every bottle of CASTORIA, a safe and sure remedy for infants and children, and see that it bears the

Signature of *Dr. J. C. Fletcher* In Use for Over 30 Years. Children Cry for Fletcher's Castoria

The Idea.

"Why do you call that new paper of yours New Blood?" "Because I want it to circulate."

Canada's 1915 crop yield is valued at \$800,000,000, with wheat heading the list at more than \$312,000,000.

THOUSANDS HAVE KIDNEY TROUBLE AND DON'T KNOW IT

Weak and unhealthy kidneys cause so much sickness and suffering and when through neglect or other causes, kidney trouble is permitted to continue, serious results may be expected.

Your other organs may need attention—but your kidneys should have attention first because their work is most important.

If you feel that your kidneys are the cause of your sickness or run down condition commence taking Dr. Kilmer's Swamp-Root, the great kidney, liver and bladder remedy, because if it proves to be the remedy you need and your kidneys begin to improve they will help all the other organs to health.

Prevalency of Kidney Disease.

Most people do not realize the alarming increase and remarkable prevalence of kidney disease. While kidney disorders are among the most common diseases that prevail, they are almost the last recognized by patients, who usually content themselves with doctoring the effects, while the original disease constantly undermines the system.

SPECIAL NOTE—You may obtain a sample size bottle of Swamp-Root by enclosing ten cents to Dr. Kilmer & Co., Binghamton, N. Y. This gives you the opportunity to prove the remarkable merit of this medicine. They will also send you a book of valuable information, containing many of the thousands of grateful letters received from men and women who say they found Swamp-Root to be just the remedy needed in kidney, liver and bladder troubles. The value and success of Swamp-Root are so well known that our readers are advised to send for a sample size bottle. Address Dr. Kilmer & Co., Binghamton, N. Y. When writing be sure and mention this paper.
